

Interprofessional Health Education Innovation Fund 2006/07 (IHEIF) Projects

The Interprofessional Health Education Innovation Fund 2006/07 (IHEIF) was an initiative administered by the Ministry of Training, Colleges and Universities to develop innovative education programs to assist health care providers in interprofessional / interdisciplinary development activities, skill enhancement and retraining throughout all stages in their careers. The IHEIF reflects the value of different health professions working together in an interprofessional care setting to advance quality patient care.

	Organization	Project Title	Location
